Incident Summary

Web service performance has degraded, with request latencies increasing to over 130ms, up from a baseline of around 110ms.

Severity

Medium

Affected Services

web

Timeline

- 2026-10-18T11:25:08.823184+00:00: Deployment of version v2.2.0
- 2026-10-18T16:13:08.825662+00:00 - 2026-10-18T16:24:08.826080+00:00: Latency consistently above baseline

Root Cause

Unknown

Confidence

Low

Evidence

- Recent deployment of version v2.2.0
- Request latencies increased to 131.0ms, up from an average of 110.2ms

Customer Impact

Unknown

Recommended Action

Review the code changes in version v2.2.0 for potential performance regressions.

Follow-Up Investigation

Investigate logs and metrics for specific errors or performance bottlenecks introduced in the v2.2.0 deployment.
