Investigation request	investigate the 3 services
Tool calls	9

Incident Summary

The incident involves the web, api, and db services. There has been a recent deploy to the web service, but no recent deploys to api and db services. Logs, metrics, and recent deploys do not show any anomalies or issues.

Severity

Unknown

Affected Services

web, api, db

Timeline

- The latest deploy to the web service was at 2026-10-18T16:05:08.823195+00:00 by dev-bob.
- No recent deploys found for api and db services.

Root Cause

Unknown

Confidence

Low

Evidence

- No recent anomalies found in the web service's logs or metrics.
- No recent anomalies found in the api or db services.
- Recent deploy to web service but no reported issues.

Customer Impact

Unknown

Recommended Action

- Continue monitoring the services for any unexpected behavior.
- Investigate if there are any specific issues reported by customers or observability tools that were not captured in the logs and metrics.

Follow-Up Investigation

- Monitor for any new anomalies or customer reports.
- Perform a deeper investigation into the recent deploy to the web service if any customer issues are reported.
- Check for any known issues or regressions in the deployed code.
